

# 11.1

Date:

Objective:

**A. Function**

**B. One-to-one functions**

- Determine if the graphs below are:
  - a) a function
  - b) the inverse of the graph is a function
  - c) a one-to-one function

#1

#2

#3

**C. Graphing inverses:** To find the inverse if given a table, \_\_\_\_\_ - \_\_\_\_\_ the  $x$ - and  $y$ -values.

**Examples:** Use the table of the relation to create the table of the relation's inverse.

1.

$x$	$f(x)$
0	1
5	2
10	-3
15	-10
20	-16

$x$	$f^{-1}(x)$

2.

$x$	$f(x)$
-8	0.6
-6	0.8
-4	1
-2	1.2
0	1.4

$x$	$f^{-1}(x)$

**Examples:** Label each given point. Then graph the inverse of the point and label it. Draw the line of reflection and label it  $y = x$ . Draw the inverse of the graph. Be sure to label the new graph  $f^{-1}(x)$ .

1. Way 1

2. Way 2

D. Finding the inverse of an equation.

**STEPS for finding the inverse of an equation:**

- 1.
- 2.

**Examples:** Find  $f^{-1}(x)$

1. $f(x) = 1 - 3x$	2. $f(x) = x^3 - 1$	3. $f(x) = 4x^2 - 5$
4. $f(x) = \frac{1}{4}\sqrt{x+3}$	5. $f(x) = 2\sqrt[3]{x-2} - 4$	6. $f(x) = (2x-7)^3 + 1$
7. $f(x) = \frac{2x+3}{5x-4}$	8. $f(x) = \frac{x-2}{4x+3}$	9. $f(x) = \frac{2x+1}{3x+5}$
